

Project

## Javelin Energy Services

Javelin is an independent energy company primarily engaged in the exploration, development and production of oil, natural gas and natural gas liquids.

Case Study

## OIL AND GAS

Location

South Texas, USA

Client/Contractor

Javelin Energy Partners LLC

Year

2022

### What We Delivered

DIAMETER

6"

DESIGN PRESSURE

1,000 PSI

LENGTH

2.194 KM  
7,200 feet

JOINTS

Flange Connector

DELIVERING

Gas

Future Pipe Industries deployed 7200ft of FlexStrong spoolable pipe which took only seven days to fully complete. Deploying the pipe first on the surface then using the roller/cradle technique, rolling it into the trench. This line will feed gas to the fracking at the running pressure of no more than 200psi.

Flexstrong was pulled through two bores being 10" in diameter, 200 and 150 feet in length and 12 and 15 feet in depth. Flexstrong was also pulled around two 90 degree turns by using roller/cradle technique.

“

Using the swaging process Flexstrong was connected together by installing 9 midline and 2 flanged connectors. After backfilling, Flexstrong was successfully hydro tested for 6hrs at 800psi
