His Excellency António Guterres
Secretary-General
United Nations
New York, NY 10017
United States of America

Dear Secretary-General, Guterres,

I am writing to express our company's unwavering commitment to the principles and objectives of the United Nations Global Compact (UNGC). As the Chief Executive Officer of Future Pipe Industries Group, I affirm our dedication to upholding the Ten Principles of the UNGC across our operations and throughout our supply chain. FPI will make a clear statement of this commitment to our stakeholders and the public.

Our commitment to the UNGC extends beyond mere adherence to its principles; we are deeply invested in taking tangible actions to advance the Sustainable Development Goals (SDGs). We recognize the critical role that businesses play in achieving sustainable development, and we are committed to leveraging our resources, expertise, and influence to contribute positively to society and the environment.

Moreover, we commit to fulfill our obligation to submit our annual Communication on Progress (COP) report, starting from next calendar year. This report will include a signed statement affirming our continued support for the UNGC and the completion of the online questionnaire detailing our progress in implementing the Ten Principles and advancing the SDGs.

As we move forward, we are fully committed to integrating sustainability into our business strategy, operations, and culture. We believe that by aligning our actions with the principles of the UNGC and the SDGs, we can create shared value for our stakeholders while contributing to a more sustainable and equitable world.

Some of our top prioritized SDGs include: Good health and well-being (SDG #3); Gender equality (SDG #5); continuing to expand our use of solar power for Clean energy (SDG #7); Decent work and economic growth (SDG #8) as we grow and continue to employ more people; contributing to Industry innovation and infrastructure (SDG #9); and helping to build Sustainable cities and communities (SDG #11) by using our low-carbon pipes and increasing awareness of their benefits in order to encourage customers to switch to low carbon options; Climate Action (SDG #13) and building partnership for the goals (SDG #17) with associations/committees working in new energies (e.g. hydrogen) and helping to establish new global standards in the sector.

Thank you for your leadership and for the important work of the United Nations in advancing global sustainability and development. We stand ready to collaborate with the UN and our fellow signatories to drive positive change and build a better future for all.

Sincerely,

A handwritten signature in blue ink that reads "Maged Basta". The signature is written in a cursive style with a large, sweeping flourish at the end.

Maged Basta
Chief Executive Officer
Future Pipe Industries Group
